

CHEM173 Extra Credit Review Slide

Spring 2006

OPTIONAL Extra Credit Assignment: Prepare one single slide in power point (ppt) format that illustrates ONE of the key concepts (“sine qua non”) from this quarter. Your slide should be entirely original, but may use publicly available artwork or graphics. The slide should include no more than 30 words (or equivalent equations, each defined variable equals one word). The notes section of the slide should include a 100 word explanation of the scientific explanation and evidence for the concept. All references used should be cited; all citations should be included in the “notes” section of the slide.

Grading: A single file with a single ppt slide should be emailed to lmrussell@ucsd.edu with cc to aaault@ucsd.edu by 9 am on Friday, June 9. The review slide will be awarded up to 10 points toward your grade on the final exam. The grade will be based on the clarity of the scientific explanation and the creativity of the illustration.
